# Tsung-Hsuan TSAI

Birth: 13 April 1996

Email: tsai71517@gmail.com

Website: https://tsung-hsuan-tsai.github.io/

Last update: 12 September 2022

## RESEARCH INTEREST

• Random groups • Geometric group theory • Small cancellation theory

#### RESEARCH EXPERIENCE

2019 - 2022 Institut de Recherche Mathématique Avancée, Strasbourg, France

Ph.D. in Mathematics, supervised by Thomas Delzant

Thesis: Phase transitions in random group: free subgroups and van

Kampen 2-complexes

2019.05 - 06 Institut de Recherche Mathématique Avancée, Strasbourg, France

Research internship M2, supervised by Thomas Delzant

Subject: Random groups: the binomial triangular model

2018.06 - 07 Université de Padova, Padova, Italie

Research internship M1, supervised by Remke Kloosterman

Subject: Fundamental groups of complements of singular algebraic curves

2017.05 - 06 Laboratoire de Mathématiques Jean-Leray, Nantes, France

Research internship L3, supervised by François Laudenbach

Subject: Algebraic topology and applications: Schreier Theorem and

Poincaré paving

## **EDUCATION**

2019 - 2022 Université de Strasbourg, France

Ph.D. in Mathematics, supervised by Thomas Delzant

2016 - 2019 École normale supérieure de Rennes, France

Normalien à titre étranger

M.Sc. in Mathematics at Université de Rennes 1, 2019
B.Sc. in Informatics at Université de Rennes 1, 2018
B.Sc. in Mathematics at Université de Rennes 1, 2017

2014 - 2016 Lycée Janson de Sailly, Paris, France

Classe préparatoire aux grandes écoles, MPSI and MP

#### **TEACHING**

#### 2019 - 2022 Université de Strasbourg, France

Teaching assistant

2019,2020,2021 autumn: TD Algèbre S5 (exercise sessions of the course Introduction to group theory for 3rd year).

2020,2021,2022 spring: CI Math pour les sciences 2 (lecturer of the course Basic linear algebra for 1st year).

# PUBLICATIONS AND PREPRINTS

2021 T.-H. Tsai, Density of random subsets and the intersection formula. Preprint arxiv: 2104.09192.

Accepted for publication in the *Journal of Combinatorial Algebra*, DOI: 10.4171/JCA/63.

**2021** T.-H. Tsai, Freiheitssatz and phase transitions for the density model of random groups.

Preprint arxiv: 2111.08958.

# **TALKS**

- 2021.12.17 Topology seminar, Institut Fourier, Grenoble, France. Freiheitssatz for the density model of random groups.
- 2021.12.14 ENS Group theory seminar, Paris, France (Online). Freiheitssatz for the density model of random groups.
- 2021.12.06 SErgodic theory seminar, IRMAR, Rennes, France. Freiheitssatz for the density model of random groups.
  - 2021.09 Séminaire Doctorant, IRMA, Strasbourg, France.
    Groupes à petite simplification et un théorème de non-torsion.
  - 2020.10 Séminaire Doctorant, IRMA, Strasbourg, France.
    La plupart des groupes sont hyperboliques.
  - 2020.02 Séminaire Doctorant, IRMA, Strasbourg, France.
    Ensembles aléatoires : définitions et applications à théorie des groupes.
